Website: lesang.id.vn

SUMMARY

Results-driven Software Engineer with 2+ years of experience in designing, developing, and maintaining scalable web applications. Proficient in JavaScript, TypeScript, Go, and modern frameworks like React and Node.js. Passionate about optimizing performance, refactoring legacy systems, and delivering high-quality software solutions.

PERSONAL EXPERIENCE

Dision Tech(HCM) - Software developer

July 2024 - Present

- Responsibilities:
 - Developing and maintaining scalable web applications.
 - Building a front-end application for network security, similar to an XDR (Extended Detection and Response) tool, to monitor and respond to security threats in real-time.
 - Ensuring high performance and responsiveness of the application.

- Technologies: React

Skydev(HCM) - Software developer

February 2023 - June 2024

- Responsibilities:
 - Leading the effort to migrate legacy back-end projects into newer and more popular technologies.
 - Working directly with the Product Owner and the Design Team to define the product roadmap. Build features and improvements based on the roadmap.
 - Define the architecture and coding convention, and set up CI/CD systems for projects.
 - Optimizing performance and setting up load balancing for server handling 10,000 concurrent user requests.
 - Maintaining legacy systems. Refactoring code and integrated payment processing with Mono, ZaloPay.
- Technologies: React, NodeJS, PostgreSQL, Docker.

FPT Software(HCM) - Internship

June 2022 - August 2022

- Responsibilities:
 - Improved team collaboration and knowledge sharing by introducing collaborative tools and conducting regular knowledge-sharing sessions.
 - Design the database schema, implement important sections of the front-end application, back-end services.
- Technologies: NodeJS, React.

PERSONAL PROJECTS

Project Name: E-commerce Platform

- Developed a full-stack e-commerce platform with user authentication, product management, and payment integration.
- Technologies: React, Go, SQLite.

SKILLS

- Programming Languages: JavaScript & TypeScript, Go.
- Frameworks/Platforms: React, Nodejs.

- Database Management Systems: PostgreSQL, MongoDB.
- Others:
 - Good understanding of OOP methodologies, SOLID principles, and design patterns.
 - Experience in setting up CI/CD pipelines, using Docker.

EDUCATION

HCMC University of Technology and Education(HCMUTE) – Bachelor of Software Engineering

November 2019 – March 2024
